

PL-211 TOP LABELING MACHINE

Specification

- Supply Voltage: 220/110 VAC 50/60 HZ 1 phase
- Power Consumption: 700 VA
- Dispensing Speed: 40 m/min max.
- Conveyor Speed: 40m/min max.
- Applicator Height: 150mm / 200mm
- Label Size: 150mm x 300mm max.
- Conveyor Width: 180mm
- Spool Diameter: 76mm
- Dimension: 1300mm (L) x 750mm(W) x 1470mm(H)

PL-211

TOP LABELING MACHINE

Pack Leader boasts a broad selection of quality, versatile labeling machines to suit the specific labeling requirements of companies across the globe. The PL-211 inline labeling system is part of Pack Leader's impressive portfolio offering high efficiency and simplicity desired for top label applications.

Straightforward Design

Applying labels to the top of products is built into the PL-211's top apply design.

Simple to Use

The built-in operating instructions and trouble-shooting guide offered on the operator interface, as well as hand wheels that provide for simple adjustments, enable quick set-up and easy changeover.

Made to Last

In strict compliance with Good Manufacturing Practices (GMP) standards, the PL-211 is made of 304 stainless steel and anodized aluminum, and carefully treated to guard against the effects of harsher environments. This durability translates into a solid choice for labeling machine longevity.

Flexible

- For diverse product sizes and shapes, the PL-211 product sensor can be adjusted for various applications. With the manual position setting, your labels are placed accurately on the product, each and every time.
- The hot-foil printer controls allow for future upgrades if the need for a hot-foil printer arises. This integrated feature allows the hot-foil printer to work in sync with the labeler to ensure accurate code placement. The result is simplified label customization, which can easily be turned off or on.
- Depending on your needs, this machine can be used either for in-line automatic or semi-automatic applications.

Productive

- The Production Preset function enables the machine to automatically stop once the pre-set quantity of products has been labeled.
- The Label Countdown feature allows you to see precisely how far along the project is as the production run progresses.
- The Container / Production Run Counter provides the total production number for the day.
- With the Touch-Screen Control System with Job Memory, you benefit from a battery-free microprocessor control system that can maintain default settings and memory even after the machine sits idle for a long period of time.

Practical

- The PL-211 can easily and conveniently be moved to other production areas to allow for changing in production or products.
- The durability inherent with the PL-211 is due to its being made from 304 stainless steel and anodized aluminum, specially treated to guard against rusting and other effects from the harsher environments.
- The machine's height-adjustable conveyor affords you exceptional convenience and flexibility.

Compliant

The PL-211 is manufactured in compliance with Good Manufacturing Practices (GMP) standards, and according to strict ISO 9001 quality control procedures. Pack Leader's compliant labeling machine gives you a high comfort level as you undergo the required quarterly inspections from industry compliance auditors.
